

Nine years ago, We, the Five passionate young people met and came together because of the idea of Life by green, Save for our next generation.

According to the latest report of the WHO, nearly 7 million people died from environmental pollution in 2017, and The Asia-Pacific region, including China, has the most serious environmental pollution, Also WHO estimates that about 90% of the world's people breathe polluted air. In the past six years, the level of ambient air pollution has been at a high level and is close to stability.

In 2015, the “Toxic flooring” event made us to look for a revolution in the flooring Industry, and therefore, we are here.

Our SPC Rigid core vinyl flooring is made from a combination of natural limestone powder, polyvinyl chloride, and stabilizers. This provides an incredibly stable base for each flooring plank. Installing our SPC vinyl flooring offers the biggest benefit to homeowners is Environmentally friendly renewable as free formaldehyde.
